- Our own Craig Carnick gave us an impromptu program tonight on the current Financial Crisis just being experienced and from which we are recovering.
- Craig feels the large banks are definitely a major part of the problem and not really the solution. With current law changes regarding credit cards and banking we should brace for a host of new fees and hidden charges to emerge from the banking system.
- Craig explained the genesis of the crisis from the packaging/pooling of sub-prime mortgages to the insuring of these pools by the same people who bought them— thus they played both sides of the game, and when the underlying mortgages failed they had nowhere to turn. Thus, the bailouts. Naturally, Craig had a way more detailed and thorough explanation than I can give here, but suffice it to say we hope to not repeat this bad behavior again.
- Hopefully we are back on the right track, so keep the faith!

Outside and inside views of the giant tent in which the festivities for the 2010 Pikes Peak Marathon and Ascent were held. We served food inside the tent from our trailer and cooking equipment just outside the tent. Upper right photo shows the hard working Kiwanians taking a break!
